GENERAL INFORMATION

Clinical immunology/allergy focuses on disorders characterized by defective responses of the body's immune system.

This broad field generally includes atopic diseases, asthma, anaphylaxis, rhinitis, eczema, adverse reactions to environmental agents of all types (e.g., drugs, foods, insect stings, industrial exposures), immune deficiency diseases (both acquired and congenital), immunotherapy of all types (biological, pharmacological, physical), defects in host defense, the immunologic aspects of systemic diseases, and problems related to autoimmune disease, organ transplantation or malignancies of the immune system.

GENERAL INFORMATION

Clinical immunologist/allergists are expected to achieve competence in the utilization and interpretation of common laboratory procedures relevant to clinical immunology/allergy. They spend a good deal of time directly seeing and caring for patients who are generally healthy and tend to respond positively to therapy. Chronic or recurrent patient problems make the role of this specialist as much preventive and educational as diagnostic and therapeutic.

This specialty has the ability to readily diagnose and effectively treat the majority of their patients. It has little pressure associated with it in the sense that few patients ever require hospitalization. This specialty has reasonable schedule demands, largely offering regular and predictable hours.
GENERAL INFORMATION

Upon completion of medical school, only candidates certificated by the Royal College in internal medicine or pediatrics may be eligible for the Certificate of Special Competence in Clinical Immunology and Allergy. One must complete 2 years of approved residency in immunology and allergy, not more than one of which may be undertaken during training for certification in pediatrics or internal medicine.

For further details on training requirements please go to:

Royal College of Physicians and Surgeons of Canada

Percentage by remuneration method

Primary payment method\(^1\) in 2013**

- **90% + fee-for-service**: 42%
- **90% + salary**: 52%
- **90% + other\(^*\)**: 6%
- **Blended**: NR

* Other includes capitation, sessional, contract and other methods

**Most recent available data for this specialty

1. National Physician Survey, 2013, CFPC, CMA, Royal College
2. National Physician Database, 2014/15, CIHI

Average gross fee-for-service payment per physician for Internal Medicine & subspecialties in 2015/16 (those earning at least $60,000) = $407,224\(^2\)

Average percent overhead reported by Internal Medicine specialists in 2010** = 22%\(^3\)
Professional & work-life balance satisfaction, 2013*

Balance of personal & professional commitments

- 6% Dissatisfied or very dissatisfied
- 26% Neutral
- 23% Satisfied or very satisfied
- 44% NR

Current professional life

- 4% Dissatisfied or very dissatisfied
- 7% Neutral
- 16% Satisfied or very satisfied
- 74% NR
