GENERAL INFORMATION

Gastroenterology is a subspecialty of internal medicine and/or pediatrics dealing with the diagnosis and treatment of diseases and disorders related to the digestive system including the esophagus, stomach, small intestine and large intestine (colon), gallbladder, pancreas and liver. It is a procedures-oriented specialty that requires some manual dexterity and the ability to analyze problems and data.

The gastroenterologist is generally not the primary-care physician, but instead, part of a health care team that provides a diagnostic and therapeutic function in patient care.

## GENERAL INFORMATION

Gastroenterologists treat a broad range of conditions, including, but not limited to:

- Abdominal pain
- Abnormal x-ray findings
- Colon cancer
- Colon polyps
- Colon screening exams
- Constipation
- Crohn's Disease
- Diarrhea
- Difficulty swallowing
- Diverticulosis
- Esophageal reflux
- Gastritis
- GERD
- Heartburn
- Hemorrhoids
- Hepatitis
- Hiatal hernia
- Indigestion
- Irritable Bowel Syndrome
- Jaundice
- Liver disease
- Malabsorption
- Nausea diarrhea
- Post-operative colon tests
- Rectal bleeding
- Spastic colon
- Ulcers
- Ulcerative Colitis
- Unexplained weight loss
- Vomiting

GENERAL INFORMATION

Gastroenterologists do not perform surgery; however, they do perform procedures such as liver biopsies, endoscopic ("scope") examinations of the esophagus, stomach, small and large bowel. Gastroenterologists frequently work with surgeons in helping them select the best operation for a particular patient.

After completing medical school, to become a gastroenterologist requires a further 6 years of training in Royal College-approved programs. Physicians must first successfully complete either a 4 year residency in internal medicine or pediatrics, followed by an additional 1-2 years training in gastroenterology.

For further details on training requirements please go to:

Royal College of Physicians and Surgeons of Canada
