General information

Internal medicine is a broad-based specialty that has its roots in primary care and is dedicated to providing primary and specialty care to adults. Internists diagnose and manage diseases involving any of the organ systems and are specially trained to manage seriously ill patients suffering from advanced illness and/or diseases of more than one system.

Internists provide care in an office setting, in hospitals and on a continuing ambulatory basis. They tend to the general medical needs of their patients in the office, including disease prevention, early detection of disease, screening, patient education and follow-up care from hospitalization.

In the hospital and ambulatory setting, internists manage acute and chronic illness of their patients and other patients that have been referred to them by other practitioners such as family physicians. They are also trained to meet the special needs of the geriatric population.

Source: Pathway evaluation program
General information

Internists are trained in many procedures from many different disciplines and they perform these independently. They may also take additional training and subspecialize in the following areas of internal medicine:

- Critical care medicine
- Cardiology
- Infectious diseases
- Neurology
- Respiratory medicine
- Rheumatology
- Endocrinology and metabolism
- Gastroenterology
- General Internal Medicine
- Geriatrics
- Hematology
- Medical oncology
- Clinical allergy and immunology
- Dermatology

Source: Pathway evaluation program
General information

In addition to their medical work, internists also organize and co-ordinate their patient’s care and ensure that they gain access to the care they need.

After completing medical school, to become an internist requires additional training that takes 4 years. Those who choose to subspecialize are required to complete 2 years of subspecialty training, which they can begin once completing the three core years of the internists program, for a total of 5 years of postgraduate education.

For further details on training requirements please go to:
Royal College of Physicians and Surgeons of Canada
Canadian Society of Internal Medicine
