General information

Ophthalmology deals with the screening, diagnosis and management of optical, medical and surgical disorders and diseases of the eye, associated orbital structures and neuro-visual pathways. The specialty relies on a combination of diagnostic, medical and surgical skills. Most surgical interventions are microsurgical requiring excellent fine-motor manual dexterity.

Ophthalmologists operate within a fairly specific area of expertise but on a broad range of patients, from newborns to geriatric patients. A large portion of the care and treatment they provide is done in their private office. They are the leaders of the eye care team interacting with other physicians and health care professionals in the management of eye care, including orthoptists, ophthalmic technicians, nurses and optometrists.

General information

There are a number of subspecialties within ophthalmology, including cornea and external disease, glaucoma, neuro-ophthalmology, ophthalmic pathology, ophthalmic plastic surgery, pediatric ophthalmology, retina, uveitis and low vision. Upon completion of medical school, to become certified in ophthalmology requires an additional 5 years of Royal College-approved residency training. This training includes:

- 1 year of basic clinical training;
- 4 years of Royal College-approved residency in ophthalmology, including sufficient experience to achieve competency in performing procedures such as: topical & regional anesthesia (of the eye and periocular structures); laser therapy; surgery (for cataract, enucleation, eyelids, glaucoma etc); surgical management of trauma to the eye, ocular adnexa and orbit; ultrasound examination of the eye, and interpretation of diagnostic imaging of the eye and visual system.
General information

Residents must also have sufficient experience to achieve competency in collecting and interpreting data, carrying out diagnostic procedures, making appropriate clinical decisions including recommending appropriate therapeutic procedures in specific domains such as cornea/external disease, glaucoma, and trauma to the eye, ocular adnexa and orbit.

For further details on training requirements please go to:
Royal College of Physicians and Surgeons of Canada
Canadian Ophthalmological Society
